Invitation

2nd World Congress and Expo on Oil, Gas and Petrochemistry invite all the participants across the globe to Abu Dhabi, UAE from November 28-30, 2016 with the theme “*The Journey of Unconventional Resources from Exploration to Successful Development*”. Petrochemistry-2016 addresses issues involved in asset condition evaluation for exploration, drilling, production systems, pipelines, terminals, refining, chemical manufacturing and storage facilities and health hazards. Each day focuses on presentations relevant to upstream, midstream, downstream operation and integrity management and provides an opportunity to learn about new and existing industry codes and standards, to hear about emerging trends from experts. The conference will bring together all the experts and professionals of the industry, academia, consultancies, and scientists and will offer them a great platform where they can share their experiences and ideas with others and discuss about the latest advancement of the energy sector.

Regards,

Petrochemistry-2016 Operating Committee

About Us

At scientific future, we organize and facilitate professional and scientific conferences. scientific future is one of the innovative organizers of conferences, workshops and exhibitions. our conferences offer premier content, tremendous delegate experience and extraordinary networking opportunities. Each meeting is organized by leaders in the field, using their expertise to ensure the key topics are covered. the focus on discussion throughout the meeting offers each attendee, at any stage of their scientific career, to get involved in the discussion. scientific future is provider of information, solutions to enhance the performance and progress of science, nutrition, health, and technology professionals, and is empowering them to make better decisions, deliver better care, and sometimes make groundbreaking discoveries, that advance the boundaries of knowledge and human progress.

Mission

- We believe in saving time
- We coordinate as one-stop shop with in-house meeting support
- Association/membership
- Professional publishing and editing staff
- Website design and hosting
- Exhibit sales and sponsorships
- Marketing and program material
- Coordination of meeting requirements with suppliers and facilities
- Abstract and poster session management
- Registration processing and badge/ticket production

Conference Highlights

- Geology & Exploration
- Reservoir Characterisation
- Drilling & Well Operations
- Process Technology
- Chemical Applications
- Enhanced Oil & Gas Recovery
- Pipelines & Transportation
- Onshore/Offshore Support
- Upstream/Downstream & Midstream Integration
- Unconventional Resource
- Gas Supply & Gas Technology
- Sustainable Energy
- Health, Safety, and Environment

About Abu Dhabi

Abu Dhabi is the capital and the second most populous city in the United Arab Emirates (the most populous being Dubai), and also capital of Abu Dhabi emirate, the largest of the UAE's seven member emirates. Abu Dhabi lies on a T-shaped island jutting into the Persian Gulf from the central western coast. The city proper had a population of 1.5 million in 2014.

Abu Dhabi houses federal government offices, is the seat of the United Arab Emirates Government, home to the Abu Dhabi Emiri Family and the President of the UAE, who is from this family. Abu Dhabi's rapid development and urbanisation, coupled with the relatively high average income of its population, has transformed the city into a large and advanced metropolis. Today the city is the country's center of political and industrial activities, and a major cultural and commercial centre, due to its position as the capital. Abu Dhabi accounts for about two-thirds of the roughly \$400-billion United Arab Emirates economy.

Abu Dhabi is the fourth most expensive city for expatriate employees in the region, and in 2014 was the 68th most expensive big city in the world.
